GETTING STARTED

Insert the Battery

1. Push the latch release button and pull the latch down; then remove the battery cover.

2. First insert the upper side (contacts), then the bottom side of the battery pack into the slot:

3. Reinsert the cover. First insert first the upper side and then press the latch release button and pull the latch down to insert the bottom. Push the knurled section of the latch upwards to close the cover:

Charge the Battery

With Power Supply

With Single Cradle

Do not use the Memor X3 until batteries are charged for minimum 4 hours.

CAUTION

SYNCHRONISE YOUR DEVICE WITH THE PC

Set up Synchronisation using Windows Mobile® Device Center

Windows Mobile® Device Center can be downloaded from Microsoft website www.microsoft.com. It is only compatible with Windows Vista and Windows 7; if you run Windows XP or earlier, you have to download Microsoft ActiveSync.

You can establish a connection to your Memor X3 through the following interfaces:

- USB either directly or through the Single Dock
- RS232 either directly or through the Single Dock
- Bluetooth®

To establish a partnership between the Memor X3 and a host PC, start Windows Mobile® Device Center and follow the steps below:

1. Connect the Memor X3 to the host PC. Windows Mobile® Device Center configures itself and then opens.
2. On the license agreement screen, click Accept.
3. On the Windows Mobile® Device Center's Home screen, click Set up your device.
4. Select the information types that you want to synchronize, then click Next.
5. Enter a device name and click Set Up.

When you finish the setup wizard, Windows Mobile® Device Center synchronizes the mobile computer automatically. Microsoft® Office Outlook® emails and other information will appear on your device after synchronization.

Communicate with Host

INSTALLING A MICROSD CARD

- 1. Turn off the Memor X3.
- 2. Push the latch release button and pull the latch down (see section GETTING STARTED); then remove the cover and the battery pack:

- 3. Open the microSD card slot by lifting up the locking plate:

- 4. Shift the cardholder upwards and then pull it up:

- 5. Insert the microSD card with the written part upward:

- 6. Lock the card into place by pushing the cardholder down and then shifting it downwards; push the locking plate down:

- 7. Reinsert the battery cover (see section GETTING STARTED).

SCANNING AND IMAGING

Laser Data Capture

2D Imager Data Capture

Relative Size and Location of Aiming System Pattern

Linear Imager Data Capture

Scanning with a Memor X3 Linear Imager

When beams reflect directly back into the scanner from the bar code, they can "blind" the scanner and make decoding difficult.

To avoid this, don't keep the terminal perpendicular to the barcode: moving it of a small angle of $\pm 2^\circ$ is usually enough to enable proper reading. But don't scan at too oblique an angle either: keep the scanner within an angle of $\pm 30^\circ$ from the perpendicular to the barcode in order to guarantee effective scanning.
